FIRESTOP Cable Ties

DEFINITION

FIRESTOP Cable Ties are stainless steel strapping systems designed for:

- securing fire-rated / thermal duct wrap around the ductwork
- organising or clamping cables, wires, hoses, and other items.

The ties consist of a self-locking mechanism that ensures a tight grip and, once tightened, provides a reliable solution for:

- temporary installations
- permanent installations.

PRODUCT CHARACTERISTICS

FIRESTOP Cable Ties:

- Made from high-quality stainless steel
- Have high clamping force hence long-term stability
- Provide secure fastening - straps hard to cut or undo
- Resistant to extreme acidity, alkalinity and highly corrosive environments.

TECHNICAL PARAMETERS

Packaging	Plastic bag
Quantity per bag	50 items
Width	12mm
Length	From 300mm up to 3,000mm
Material	Stainless steel 304 grade
Operating temperature	-80 °C to +500 °C
Yield strength	205MPa
Loop tensile strength	Heavy duty range 110kg
