Allproof Low Profile Fire Collar Plastic Pipe through a 2 x 13mm Plasterboard Ceiling-Particleboard Floor See pg2 for PVC, PP-R, PEX, etc

INSTALLATION INSTRUCTIONS:

1. Ensure substrate around the pipe is flat and free from obstructions.
2. Seal the annular space between the plasterboard and the pipe with Allproof MAS310 fire sealant to a depth of at least 13mm
3. Open pipe collar and position around the pipe.
4. Slide tab through slot in pipe collar and fold back 180° to secure.
5. Secure collar using metal hollow wall anchors fixed directly into the plasterboard. Do not use fixings which rely on plastic or nylon components for grip.
6. Finally seal the space between the pipe and the particleboard with a silicone sealant (or with FR Acrylic/MAS310).

Products	Allproof Low-Profile Fire Collar
Application	Fire stopping of plastic pipe in floor-ceiling system
Construction	Ceiling of 2x13mm FR plasterboard on 190mm timber framing and floor above of 19mm particleboard

Fire Classification:

See pg2 for details of pipe types and sizes:

PVC up to 150mm diam	FRR -/90/90
PVC with PVC socket up to 100mm diam	FRR -/90/90
Polybute up to 28mm diam	FRR -/90/90
PP-R up to 32mm diam	FRR -/90/90
PEX up to 32mm diam	FRR -/90/90

Fixing: Collars tested using hollow wall anchors

Tested using a 190mm deep timber framing with two layers of 13mm fire rated plasterboard on the exposed side of the frame and 19mm particleboard flooring on the unexposed side of the frame. A total floor-ceiling thickness of 235mm. Fire collars are fixed using hollow wall anchors directly into plasterboard - not fixed into framing or studs. Fire rated sealant is applied in the space between the pipe and plasterboard on the exposed face and silicone sealant between the pipe and particleboard flooring on the unexposed face.
